BioSonics to Offer Demonstration and Training Opportunities at Ocean Business 2011

Seattle - BioSonics Inc. will have a significant presence at the upcoming 2011 Ocean Business Exhibition in Southampton on April 5-8. [BioSonics products](#) will be exclusively featured at **Stand V11 with new products on display** including the [DT-X SUB](#), a submersible autonomous echosounder. BioSonics will also present information about their new MX Series echosounders, a lower priced single-beam system with specialized data acquisition and visualization software for aquatic habitat assessment.

BioSonics will offer a 1-hour demonstration aboard [RV Callista](#) on Wednesday, April 6 departing at 1500h. This will be an excellent opportunity to see the DT-X echosounder in action and check out Visual Acquisition 6, BioSonics latest data collection software. Space is limited so RSVP soon to confirm your space.

BioSonics is also hosting a special training meeting for their authorized distributors on Thursday, April 7 at 1300h. The meeting will provide advanced sales training with focus on data processing techniques and examples of the "end products" that can be generated using data collected with a DT-X echosounder. Please [contact Eric Munday](#) for information or to reserve your space.

About BioSonics

BioSonics is a manufacturing, consulting, and firm specializing in the application of hydroacoustic (sonar) technology for monitoring and assessment of aquatic biological resources. For over thirty years, BioSonics scientific echosounders have been used in oceans, lakes, and rivers for accurate assessment of fish abundance, distribution and behavior. Versatile and rugged design allow for installation in every aquatic environment imaginable. BioSonics offers a complete range of technical services to meet the each client's goals and requirements. Survey design, installation, data collection, environmental monitoring, data processing, analysis and reporting are our specialties.
